# GODAWARI UDYOG

## INTRODUCTION

Godawari Udyog extends the highest quality of maize/corn products in the global market. We have ventured in this business since last 20 years. We have achieved GFSI & ISO certification (FSSC 22000 & ISO 22000:2005). We are well-known name in India and Abroad.

Godawari Udyog is the most recognized and accepted brand names in the food products market not just nationally but also internationally which has created a goodwill among our customers and business community as a whole. Unitedly we can cater excellent quality of Maize/Corn grit products full of health and nutrition to our customers.

At Godawari Udyog, you receive highest caliber product and service that will make you wonder of our humility. Be one hundred percent assured that our association with you will heighten your position in the market. We maintain highest quality standards and definitely you will notice that in our product. Our product speaks for itself. The services that you receive are prompt and up to the mark. To keep up with the changing business environment we follow all Quality Standards defined for our Business that comprises of latest technology, upgraded services, and highly automated units.

# WE WORK AS ONE

## SAFETY MEASURES

We take special care of our employees by taking international safety measures where in special training is provided to our employees time to time. Safety Audits are performed once or twice every year to create awareness among our employees.

We also take great effort to motivate our employees which would enhance their productivity and create a sense of bond not just of mere employer and employee but of unity and friendship and partnership. As we work towards the similar goal of developing the existing product and also researching for the new ones.

Decisions are taken as a team and not just by few. Compared to other industries we believe in Gender equality and respect towards women. We have women working in our company. Our goal is to have it in proportion of 50-50

Each and every department head specializes and carries expertise in the area of work assigned to them.

FSSC Certificate ▲

ISO Certificate ▲

## WE ARE GFSI & ISO CERTIFIED

(FSSC 22000 & ISO 22000:2005)

Our association with leading MNC's make us stand out for our undeniably amazing quality and excellent add on services.

We are the largest supplier of Maize products, for human consumption as well as animal feed, and other corn products like Maize /Corn Grits (Corn Meal), Maize /Corn Flour, Flaking Grits and other products which serve as a raw material to major snack industries. It is the high demand product around the globe by millions of people due to its nutritious value and of course the delicious taste to crave for.

HALAL Certificate ▲

# ENVIRONMENT FRIENDLY

We are one of the rare companies where we take immense care in regard with our duty towards the environment.

We can humbly yet proudly say that in the manufacturing process there is no wastage or any residue that is released in the environment that is harmful to the nature as each and every particle of the product is further utilized. The remains after the manufacturing of the corn product are then packed and sold at low cost as the cattle feed.

Even the tiniest unused part of the seed is utilized in this manner. As we believe that we owe to the environment and we ought to be supportive and not destructive by any means.

Optimum use of natural resources is our motto without harming the environment.

## ZERO WASTAGE

# RESEARCH & DEVELOPMENT

**We are committed to achieve & sustain customers by meeting their needs. We use the latest technology to produce our products.**

Our R&D team is capable of producing customized products to meet your requirements. Consequently we can design new products or modify the existing ones. We assure you that we have a quality system for ensuring quality and safety of the food products. Our objective is to continually improve the quality and effect of our products. We are in constant communication with our customers on regular basis for any changes or improvisations in the existing products as well as their new requirements.

## INNOVATION

Our innovative approach towards corn milling is use of color sortex for corn grits. We have achieved great results after installing it in our line. Defective items and foreign material separation from product stream has become much easier.

## AUTOMATION

Processing is PLC based fully automated. Total processing is done in a Buhler Plant. The processing occurs in a closed system so no human touch is involved to maintain high level hygiene.

## GMP

Godawari Udyog, India manufactures their products according to Good Manufacturing Practice (GMP). The hygiene standards applicable to the production of Maize Grits as regulated by local and Indian regulations are carefully observed. The processes are regularly audited by our Quality Management Department.

## FOOD GRADE

All products are manufactured according to GMP, are fit for human consumption when applied to food and comply relevant legislation covering the product.

### Pest Control Management

Company has hired pest control agency for pest control.

- Potato based snack pellets
- Cereal based snack pellets
- Wheat based snack pellets

## PRODUCTS CATEGORIES

### Top Quality Ingredients

# MAIZE/ CORN GRITS

The coarsest of mill granulations, degermed corn grits are generated from the hardest portions of the corn and contain no chemicals or preservatives. This grits are used for production of extruded snacks. They can be used in applications ranging from ready-to-eat cereals to brewing adjuncts and pet foods. Also, utilized in pizza and bakery products.

## MAIZE / CORN FLAKING GRITS

These are the prime products from a full degerming system consisting of the largest pieces of broken maize endosperm **free of husk and germ.**

Main use of this product is production of Corn Flakes.

Degermed corn flour is a fine granulation product milled to a uniform, consistent texture, and doesn't use any chemicals or preservatives. Applications include: bakery mixes, extruded cereals, extenders, or coaters and breadings.

## MAIZE / CORN FLOUR

# SECURE CORN DIRECTLY FROM FARMER

**Drying with husk in a clean environment / educating farmer (principle manufacturer) about post harvest critical control.**

Implement the same from farm level to ensure microbial control.  
Purchase after confirming the moisture levels and microbial test's.

## BUYING METHOD CURRENT

- Informal Contract to help dry the corn in husk condition than the traditional practice of the farmer.
- Educate drying in proper environment and provide sheets for drying.
- De-kernelling under inspection to contain maximum exposure from foreign material
- De-kernelled grains to be stored in Hermetic bags and to transport the same to a proper warehouse.
- Cleaning of Corn at a cleaning facility. Purchase of the corn from the processor.

- Total control over the material.
- Can educate farmers and propagate for PHASE II.
- Upto recent test's show positive aflatoxin result for being able to attain below 10 ppb control.
- We conduct the test with portable afla toxin kits pre –purchase.
- We have tested the material with Microchem and have a positive result for the microbiological control.
- Enclosed the material specifications for quality alaysis.

## EACH SEED TESTING

# GODAWARI EXPORT SERVICES
